CONTENTS OF VOLUME 60

NUMBER 1—JULY

PAGE

Gain and phase margins of the guaranteed cost regulator
O. I. KOSMIDOU and H. BOURLÈS 1

Back-propagation neural-network based fuzzy controller with a self-learning teacher
D. A. LINKENS and JUNHONG NIE 17

Closed-form solutions to a class of H_∞-optimization problems
A. SABERI, B. M. CHEN and ZONGLI LIN 41

Investigation of the ICD structure of systems defined by state-space models
W. E. LEITHEAD and J. O'REILLY 71

Model reference control of non-linear systems via implicit function emulation
C. J. GOH 91

An auto-tuner for a Smith dead time compensator
Z. J. PALMOR and M. BLAU 117

Design of P and PI controllers for unstable first-order plus time delay systems
V. VENKATASHANKAR and M. CHIDAMBARAM 137

Correspondence

A rational basis for the pole–zero map in controller discretization
A. M. DE PAOR and M. J. O'MALLEY 145

Note on the generalized H_∞-optimal control problem
K. G. WOODGATE 153

Corrigendum

Corrections to 'Robust stability and performance of systems with structured and bounded uncertainties: an extension of the guaranteed cost control approach'
O. I. KOSMIDOU 157

NUMBER 2—AUGUST

Identification of continuous time nonlinear systems using delayed state variable filters
K. M. TSANG and S. A. BILLINGS 159

A suboptimal reduction algorithm for linear systems with a time delay
DINGYÜ XUE and D. P. ATHERTON 181

A hybrid neural-network-based self-organizing controller
JUNHONG NIE and D. A. LINKENS 197

PAGE

System order reduction in robust stabilization problems
S. M. SWEI, M. A. ROTEA and M. CORLESS 223
Compensator design of semi-linear parabolic systems
NOBORU KUNIMATSU and HIDEKI SANO 243
A new autotuning method with specifications on dominant pole placement
SHYH-HONG HWANG and SHING-JIA SHIU 265
Discrete-time model following adaptive control for multivariable non-minimum-phase systems
KATSUTOSHI TAMURA, WATARU KASE and P. N. NIKIFORUK 283
Stability robustness bound estimates of discrete systems: analysis and comparison
M. HALICKA and D. ROSINOVÁ 297

NUMBER 3—SEPTEMBER

Lie algebras and the stability of nonlinear systems
S. P. BANKS and S. K. AL-JURANI 315
A class of interpolation algorithms for bounded real functions
K. PARK 331
***GH*$_\infty$ self-tuning control for multivariable systems**
M. J. GRIMBLE 347
Fast self-learning multivariable fuzzy controllers constructed from a modified CPN network
JUNHONG NIE and D. A. LINKENS 369
Illustration of the principle of matching with inputs restricted in magnitude and rate of change: vehicle speed control revisited
N. K. RUTLAND 395
A solution of the filtering and smoothing problems for uncertain-stochastic linear dynamic systems
A. R. PANKOV and A. V. BORISOV 413
Exact model matching with disturbance suppression
K. ICHIKAWA 425
Stability robustness in linear state-space models with structured time-varying uncertainties
J. S. LUO, X. F. ZHANG and A. JOHNSON 435
***H*$_\infty$-control with state feedback for time-varying discrete systems**
HITOSHI KATAYAMA and AKIRA ICHIKAWA 451

NUMBER 4—OCTOBER

Implementation of adaptive speed control algorithms for diesel-driven power plants on a digital signal processor
S. ROY and O. P. MALIK 467

PAGE

Optimal simultaneous stabilization of linear single-input systems via linear state feedback control
M. PASKOTA, V. SREERAM, K. L. TEO and A. I. MEES 483

Nonlinear control of a bioreactor model using exact and I/O linearization
T. PRÖLL and N. M. KARIM 499

Computation of the transfer function matrix and its Laurent expansion of generalized two-dimensional systems
N. P. KARAMPETAKIS, B. G. MERTZIOS and A. I. G. VARDULAKIS .. 521

Feedback linearizing and sliding mode control of a variable reluctance motor
C. ROSSI and A. TONIELLI 543

Sampled-data adaptive control of a class of continuous nonlinear systems
A.-M. GUILLAUME, G. BASTIN and G. CAMPION 569

State observation by on-line minimization
G. ZIMMER 595

Linear decoupling controllers for constrained dynamic systems
K. IQBAL, H. KALLEL and H. HEMAMI 607

Concurrency and maximally permissive feedback in Petri nets with external input places
S. TAKAI, T. USHIO and S. KODAMA 617

Automatic tuning of phase-lead and phase-lag compensators
JIE YANG, C. S. CHEN and YANGSHENG XU 631

Correspondence

Optimum dead-beat controller design for SISO systems using time-weighted performance indices
C. A. BARBARGIRES and C. A. KARYBAKAS 641

NUMBER 5—NOVEMBER

Obituary 649

A QFT-type design methodology for a parallel plant structure and its application in idle speed control
S. JAYASURIYA and M. A. FRANCHEK 653

Inversion of a distributed system for open-loop trajectory following
F. S. HOVER 671

Time delayed control of classically damped structural systems
F. E. UDWADIA and R. KUMAR 687

Algebraic aspects of controllability for AR-systems
J. HOFFMANN 715

Stability analysis of the equilibrium of a constrained mechanical system
DANWEI WANG and N. H. MCCLAMROCH 733

Dahlin minimum variance self-tuning controller
L. A. AL-CHALABI and F. F. KHALIL 747

PAGE

A new interpretation of the fault detection filter—Part 1: Closed-form algorithm
JAEHONG PARK and G. RIZZONI 767

A multidimensional realization algorithm for parametric uncertainty modelling and multiparameter margin problems
YI CHENG and B. DEMOOR 789

Frequency domain curve fitting with maximum amplitude criterion and guaranteed stability
R. G. HAKVOORT and P. M. J. VAN DEN HOF 809

Fault detection and isolation observers
M. HOU and P. C. MÜLLER 827

Non-parametric controller synthesis for NMP plants
JIANHUA PAN and J. VAN DE VEGTE 847

Maxwell's treatment of Siemens's hydraulic governor
A. T. FULLER 861

Generalized predictive control (GPC) with long-range predictive identification (LRPI) for multivariable anaesthesia
M. MAHFOUF and D. A. LINKENS 885

Extensions of mixed-μ bounds to monotonic and odd monotonic nonlinearities using absolute stability theory
W. M. HADDAD, J. P. HOW, S. R. HALL and D. S. BERNSTEIN 905

Predictive PI controller
A. BESHARATI RAD and WAI LUN LO 953

On the polynomial equations for the continuous-time LQ optimization problem
A. CASAVOLA 977

Binary rate modulation, its application and stability in control systems
N. BARRY and É. MCQUADE 987

On the optimal linear regulator
W. KRATZ 1005

Anti-windup design for internal model control
A. ZHENG, M. V. KOTHARE and M. MORARI 1015

A simple antiwindup method
J. E. LARSSON 1025

Nonlinear control of constrained linear systems
D. Q. MAYNE and W. R. SCHROEDER 1035

An intrinsic property of relative order and its application
XIAO YUN LU and D. J. BELL 1045

NUMBER 6—DECEMBER

Design of a reduced-order adaptive load-frequency controller for an interconnected hydrothermal power system
C. M. LIAW 1051

PAGE

Nonlinear control design for tip position tracking of a flexible manipulator arm
DONG LI 1065

Alternating convex projection methods for covariance control design
K. M. GRIGORIADIS and R. E. SKELTON 1083

Nonlinear model validation using correlation tests
S. A. BILLINGS and Q. M. ZHU 1107

Walsh functions for the off-line identification of nonlinear plants and their control
D. P. STOTEN and J. HARKNESS 1121

Pole mobility and minimal norm stabilization of SISO systems under bounded state feedback
X. Y. SHAN and N. KARCANIAS 1137

Adaptive model-based control using neural networks
P. M. MILLS, A. Y. ZOMAYA and M. O. TADÉ 1163

Normalized coprime factorizations and balancing for unstable nonlinear systems
J. M. A. SCHERPEN and A. J. VAN DER SCHAFT 1193

Discretization and FIR filtering of continuous linear systems with internal and external point delays
M. DE LA SEN and NINGSU LUO 1223

On state models of linear time-invariant discrete-time systems
DONGNING LI 1247

Multirate robust servomechanism controllers of linear delay systems using a hybrid structure
NIE-ZEN YEN and YUNG-CHUN WU 1265

On the relationship between the stability margin and the phase margin for multivariable systems
J. R. BAR-ON and K. A. GRASSE 1283

L_2 controller synthesis with L_∞-bounded closed-loop impulse response
Y. WILLIAM WANG and D. S. BERNSTEIN 1295

Covariance bounds for discrete-time linear systems with time-varying parameter uncertainty
P. BOLZERN, P. COLANERI and G. DE NICOLAO 1307

On dynamic input–output linearization of discrete-time nonlinear systems
Ü. KOTTA and H. NIJMEIJER 1319

A new interpretation of the fault-detection filter—Part 2: The optimal detection filter
JAEHONG PARK, Y. HALEVI and G. RIZZONI 1339

Synthesis of controller structures for robust load performance
JIN-WEN CHANG and CHENG-CHING YU 1353

A direct adaptive generalized predictive control algorithm for MIMO systems
WEI WANG 1371

PAGE

Transfer matrix approach to the structural block diagonal decoupling problem
A. BELMEHDI 1383
Correspondence
Recursive algorithm for computing the matrix partial fraction expansion of transfer matrices having multiple quadratic poles
S. ÇOBAN and A. URAZ 1393
A comment on: 'A Luenberger-like observer for nonlinear systems'
W. HARTMANN and G. ZIMMER 1401
Subject Index 1403
Author Index 1407
